AD PORTS GROUP

Services

Towage

We provide costal and terminal towage services across the wider Arabian Gulf and around the World with a highly sophisticated and modern fleet of vessels.

Pilotage

We employ a team of qualified and experienced pilots to ensure the safest navigational routes to our ports, 24 hours a day.

Vessel Traffic Systems (VTS)

We use advanced radio communication and radar surveillance technology to track vessel movements and to provide navigational assistance.

Bollard Pull Testing

We supply tailored bollard pulling services for all types of marine vessels, both large and small, from Khalifa Port, Zayed Port and Free Port.

Bunkering

Our bunkering division can supply fuel to any vessel moored within the vicinity of Abu Dhabi's ports.

Services

Fresh Water Supply

We can supply large supplies of fresh water to vessels in the vicinity of Abu Dhabi's ports, including emergency supply.

Mooring

Our licensed and knowledgeable mooring team ensure the efficient arrival and departure of vessels.

Oil Spill Response

We are well equipped to cover Tier 1 oil spills and liaise closely with agencies to cover tier 2 and 3 oil spills.

Passenger Ferry Management

We offer management services for high-speed watercraft transporting passengers between Delma Island and Mugharraq Port.

Aid to Navigation (AtoN)

Our Aid to Navigation (AtoN) service is chartered by IALA, enabling us to offer reliable and trustworthy navigational services.navigational assistance.

Bathymetric Services

Our Bathymetric services include seabed scanning, data collection, measuring sea depth and predicting changes, that all assist in delivering safe navigational and marine activities.

Wreck & Debris Removal Services

We offer quick and effective removal of wreck and debris onshore and offshore.

Yokohama Fender Supply

We use Yokohama Fenders, premium fenders, that can withstand extreme environmental conditions. Yokohama Fenders can be requested from SAFEEN Marine Services to protect and secure your vessel.
